GRADUATE SCHOOL OF EDUCATION

# Current Issues and Comparative Policy Analysis

Dr. Fernando Reimers

This presentation includes audio.  
The transcript is available to the  
left. A print version is available  
in the [Resources] tab above.

Duration: 53 minutes

# **Introduction and Overview**

# Overview

- What is education policy
- The logic theory of education policies
- The role of transfer in making education policy
- Policy analysis

# Individual & Government Decisions

- Individual Decisions
- Government Decisions
  - Availability of schools
  - Content of curriculum
  - Availability of instructional resources
  - Characteristics of teachers
  - Duration of the school day

# Key Policy Questions

- Who should be educated
- For what purpose
- In what way
- With what methods
- At what cost
- Who should pay

Teacher selection  
Initial Training  
In-service Training

Purposes

Who should be educated?

For what purposes?

Pedagogy

Management

Curriculum

School  
Management

## Economic Context

- Structure of the Economy
- Comparative Advantage
- Productivity
- Employment

## Cultural Context

- Identity
- Values
- Norms
- Shared meanings

## Political Context

- State—representation
- Governance
- State legitimacy
- Stability
- Rule of Law

## Educational Institutions

## Social Context

- Status
- Hierarchies
- Individual-Society

## Geographical Context

- Natural Endowments
- Human-Environmental Issues

## Demographic Context

- Demographic Structure
- Demographic Dynamics

Management

# Education Policy

- Education Policy decisions matter
- How are those decisions made?
  - Who makes them
  - How
  - With what consequences
- Approaches to informing policy

# **Historical Development of Education Policy**

## Illiteracy Rate in France

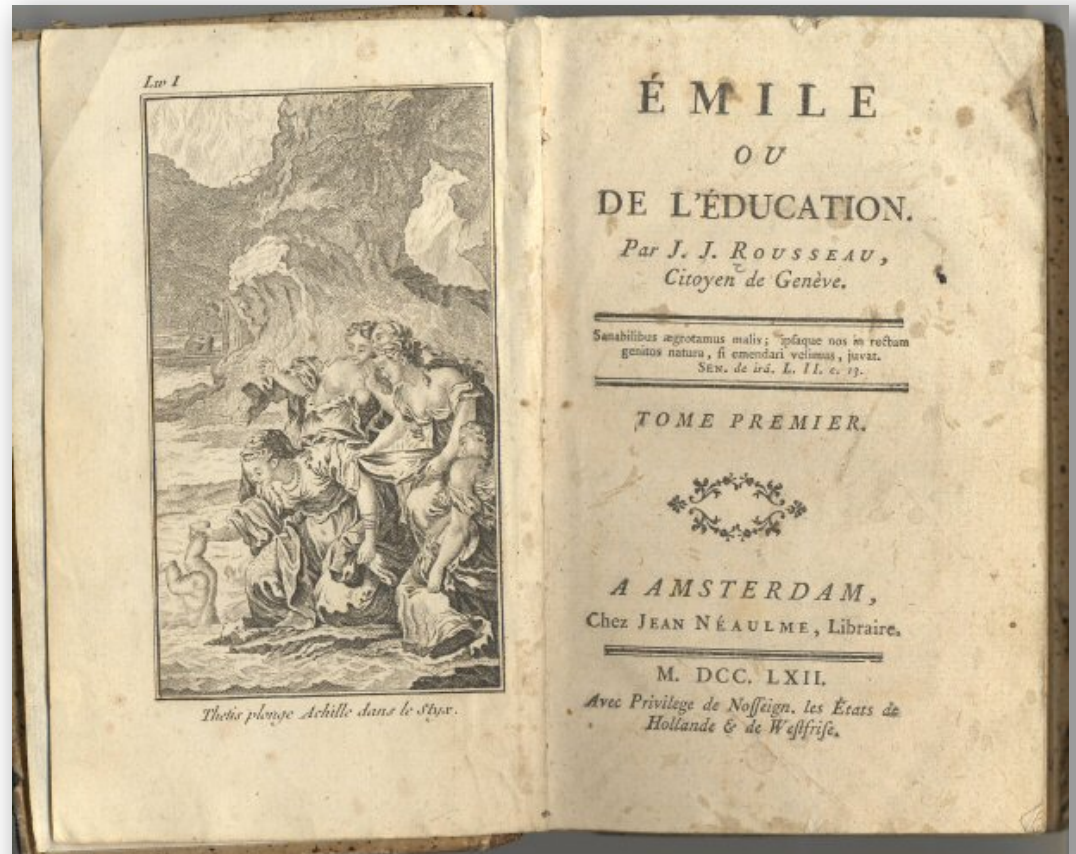

# World Illiteracy

# John Amos Comenius (1592-1670)

# Jean Jacques Rousseau (1712-1778)

# Wilhelm von Humboldt (1767-1835)

# Johann Heinrich Pestalozzi (1746-1827)

# Joseph Lancaster (1778-1838)

**HARVARD**  
GRADUATE SCHOOL OF EDUCATION

Most public education systems were created initially to provide basic literacy and basic numeracy to only select portions of the population.

- ☐ True
- ☐ False

# **Systematic Study of Education Systems**

# Systematic Comparisons are More Recent

- What is the number of students in the primary schools in the commune or district?
- What is the proportion of the total number of these students to the total population?
- Approximately how many students are grouped under a single director or teacher?
- At which age are children admitted to the primary schools?
- Are children of both sexes admitted to the same school and until what age?
- How are students assessed and for what purpose?
- How are students streamed?
- Is there peer education?
- How much time is devoted to literacy and math instruction?
- At what age do children leave primary school?

Marc Antoine Jullien in 1816

# Universal Declaration of Human Rights

- Universal Declaration of Human Rights
- Human Capital
- UNESCO

# Declaration, Article 26

**Article 26** <http://www.un.org/Overview/rights.html>

1. Everyone has the right to education. Education shall be free, at least in the elementary and fundamental stages. Elementary education shall be compulsory. Technical and professional education shall be made generally available and higher education shall be equally accessible to all on the basis of merit.
2. Education shall be directed to the full development of the human personality and to the strengthening of respect for human rights and fundamental freedoms. It shall promote understanding, tolerance and friendship among all nations, racial or religious groups, and shall further the activities of the United Nations for the maintenance of peace.
3. Parents have a prior right to choose the kind of education that shall be given to their children.

The primary intention of the RA studies that began in the 1960s was to:

- ☐ Assess student knowledge in core curricular areas
- ☐ Associate learning achievement with teaching practice
- ☐ Inform policy makers on best practices gleaned from a global approach to the study of education systems
- ☐ All of the above
- ☐ None of the above

## Quiz2

# **Policy and Effects**

# Policy and Effects

## Logic Theory, If → Then

- Inputs  
Per pupil Spending
- Processes  
Structures, Curriculum
- Outputs  
Educational Attainment,  
Literacy
- Outcomes  
Employment and  
Productivity, Political  
Participation, Social Capital

6. Frequent daily opportunities to learn at high levels, to think, choose and be tolerant
5. Curriculum for democratic citizenship
4. Teachers prepared to value diversity, tolerant and who can model democratic practices
3. Relationships between schools and communities
2. Schools that are themselves democratic communities
1. Commitment to educate all at high levels

# 21<sup>st</sup> Century Student Outcomes

## 21st Century Student Outcomes and Support Systems

# Equality of Educational Opportunity

- Equality of Access
- Equality of Inputs
- Equality of Processes
- Equality of Learning Outputs
- Equality of Outcomes (Social and Cultural Capital),  
Options in Life

# Equality of Inputs

- Per-Pupil expenditures
- Teacher characteristics
- Instructional Resources
- Physical facilities
- Learning outputs and outcomes from prior levels
- The role of school segregation

# Equality of Processes

- Instructional Practices
- Teacher responsiveness
- Time on task
- Fit between curriculum and student background
- Language of instruction

Policy formulation can best be described as

- ☐ a discrete step in the decision process
- ☐ a process that proceeds in stages
- ☐ a decision process that is not based on past processes

# **The Making of Education Policy**

# The Making of Education Policy

# Steps to Policy Making

1. Formulate Policy
2. Assess Alternatives (Ex-Ante)
3. Make the Decision
4. Implement
5. Evaluate Impact
6. Make Adjustments
7. New Policy Cycle

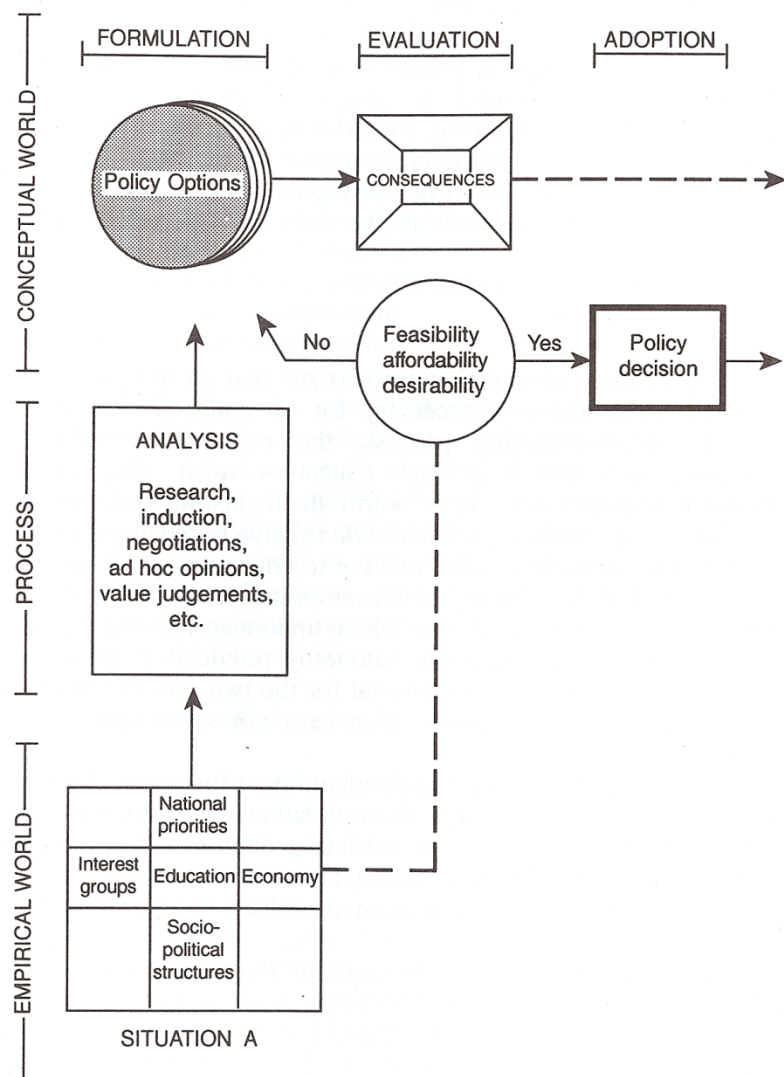

Figure 3. Conceptual framework for policy analysis

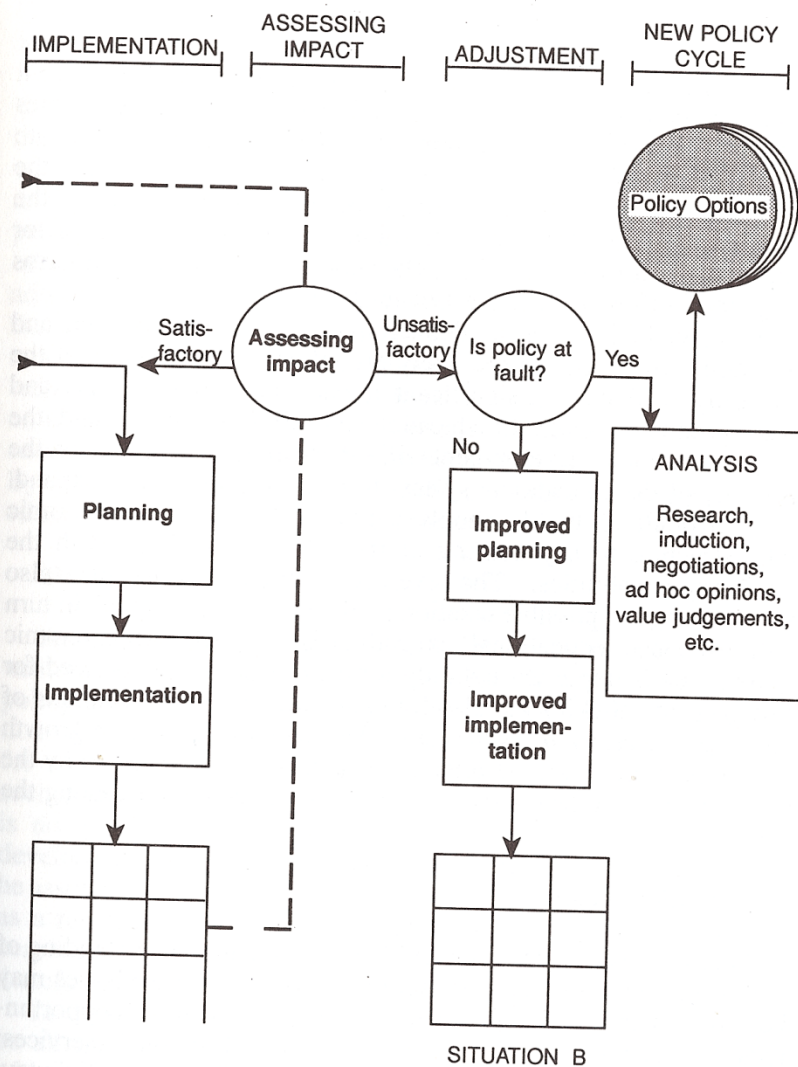

Figure 3. (continued)

# The Eightfold Path

1. Define the Problem
2. Assemble some Evidence
3. Construct the Alternatives
4. Select the Criteria
5. Project the Outcomes
6. Confront the Tradeoffs
7. Decide
8. Tell your Story

Narrative summary	Performance indicators	Monitoring and evaluation	Assumptions and risks
<b>Goal</b> More and better trained students enroll and graduate from secondary schools			
<b>Objective</b> More and better trained students graduate from primary schools at reduced costs with more gender equity			Students have support from their families to enroll in secondary schools and to continue their education  Secondary schools have excess capacity to provide education from an increased number of enrollments
<b>Output</b> Adequate, quality classrooms are used by students in the target groups			Transportation system allows children to get to schools in less than one hour  Children are well fed when they arrive at school
<b>Component activities</b> 1.1. Determine school needs for construction and rehabilitation 1.2. Construct schools 1.3. Equip schools	<b>Inputs</b> Classroom renovation US\$ xx M Administration US\$ xx M		Weather does not hinder building  Political stability

# Logical Framework Approach

# Contextualized Transfer of Ideas

1. A clear identification of needs translated into a tractable problem
2. A thorough analysis of the context in which the problem exists
3. Taking stock of existing research on the determinants of the problem at hand and on the best practices to address it in other contexts
4. An analysis of the gaps between the extant research and the context
5. Design of innovation or transfer of practices to close the gap
