

How People Learn

Module 5: Domains and Their Interconnections

Equity

Illustration of three people of different heights reaching for apples on a tree. On one side, labeled “Equality”, all of the people stand on the same height boxes. The tallest person can reach the apple, while the middle person struggles to reach the apple. The shortest person cannot reach the apple. On the other side, labeled “Equity”, the people have different heights of boxes that they stand on. The shortest person stands on the tallest box. All people are able to reach the apples now.
